

ABOUT ME

A couple of years ago, my fascination with the visual aspects of the Internet began my journey into front-end development. The rise in popularity of interactive and user-centric interfaces encouraged me to expand my experience in front-end development and gain knowledge in HTML, CSS and JavaScript.

As I immersed myself in this dynamic field, I became keenly aware of design principles, ensuring not only functionality but also an aesthetically pleasing user experience.

WORKING SKILLS

Website and Landing Page Development

TOOLS: Figma, Figma make, PS, AI, Webflow

SKILLS: Responsive design, design systems & component libraries, style guides

Now

Freelance

- Key responsibilities:**
- Design and develop responsive websites, landing pages, e-commerce stores, and dashboards from research and wireframes to launch.
 - Handle end-to-end web and front-end development, translating Figma designs into production-ready interfaces using HTML, CSS, and JavaScript.
 - Build responsive layouts, reusable UI components, and scalable component-based architecture for desktop and mobile interfaces.
 - Provide Shopify development and e-commerce store development, including custom sections and conversion-focused landing pages.
 - Implement API integration, lightweight API development, analytics, forms, CMS functionality, and third-party integrations.
 - Perform performance optimization to improve loading speed, responsiveness, SEO, and user experience.
 - Collaborate with clients, designers, and developers while continuously improving professional web development skills.
 - Use Claude Code, Lovable, and Figma Make to accelerate development and improve delivery workflows.

Skills: Figma · UI/UX & Web Design · Responsive Web Design · HTML · CSS · JavaScript · API Integration · Third-Party Integrations · Component-Based Architecture · Web Animations · Performance Optimization · Git · GitHub

- <https://krasavaw.github.io/Guardian-Group-Defense-Services/>
- <https://krasavaw.github.io/animated-octo-waffle/>

Achivements:

- Designed and launched 4+ responsive websites, landing pages for clients.
- Delivered 4+ end-to-end web projects, covering research, wireframing, UI/UX design, front-end development, testing, and launch.
- Won 4+ competitive web design projects through DesignCrowd and 99designs by creating conversion-focused concepts aligned with client requirements.
- Designed and developed 4+ landing pages for businesses, helping clients improve lead generation, product presentation, and online credibility.
- Built responsive layouts for desktop, tablet, and mobile, ensuring consistent user experiences across modern browsers and screen sizes.
- Created reusable Figma components and scalable front-end architecture, reducing design and development time across similar pages.
- Used Figma Make to accelerate prototyping and development, reducing project delivery time.
